UC1 - Request Appointment | Staff success

Precondition: Staff is logged in. Selected service is identified in the request.

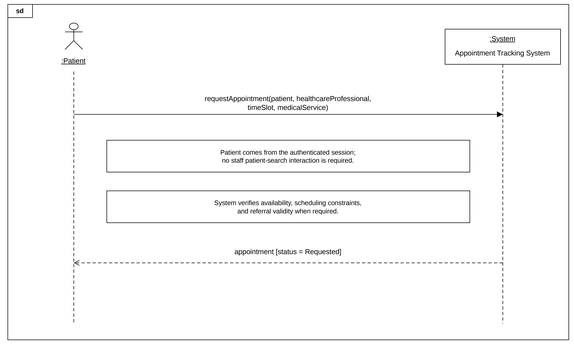

Trace: Use Case Scenarios / UC1 main steps 1-6; iter1.pdf p. 2.

Outcome: Appointment created with status Requested.

UC1 - Request Appointment | Patient success

Precondition: Patient is logged in; the session identifies the requesting patient.

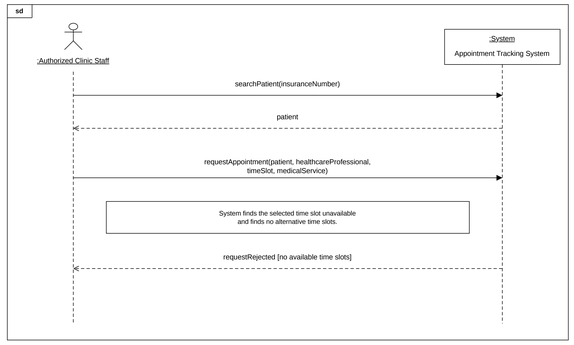

Trace: UC1 extension 1.a and main steps 3-6; iter1.pdf p. 2.

Outcome: Appointment created for the logged-in patient with status Requested.

UC1 - Request Appointment | No available slot

Precondition: Staff is logged in. Failure path: chosen slot unavailable; no alternatives exist.

Trace: UC1 extension 4.a; iter1.pdf p. 2.

Outcome: No appointment created; request ends in failure.

UC1 - Request Appointment | Patient not found

Precondition: Staff is logged in. No patient matches the supplied insurance number.

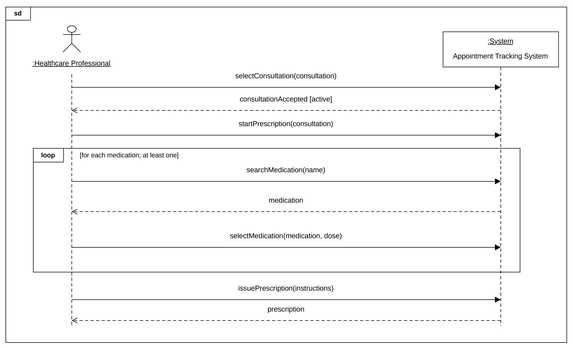

Trace: UC1 extension 1.b; iter1.pdf p. 2.

Outcome: Request cannot proceed until the patient is registered; no appointment created.

UC2 - Issue Prescription | Success

Precondition: Professional is logged in and the selected consultation is active.

Trace: UC2 main steps 1-7; medication loop interpreted as steps 3-5 (see notes).

Outcome: Prescription created for the consultation with one or more medication lines.

UC2 - Issue Prescription | Inactive consultation

Precondition: Professional is logged in. Exception: selected consultation fails the active check.

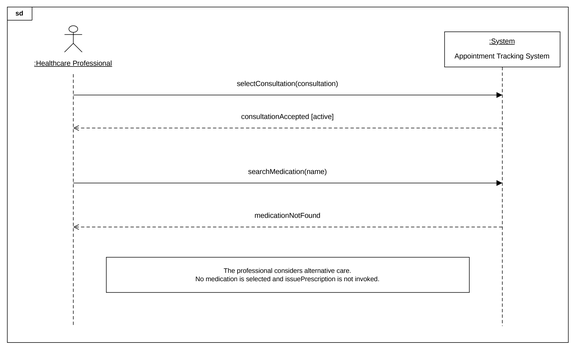

Trace: UC2 extension 2.a; existing precondition conflict documented in Sequence_Diagram_Notes.md.

Outcome: Prescription request rejected; no prescription created.

UC2 - Issue Prescription | Medication not found

Precondition: Professional is logged in; selected consultation is active.

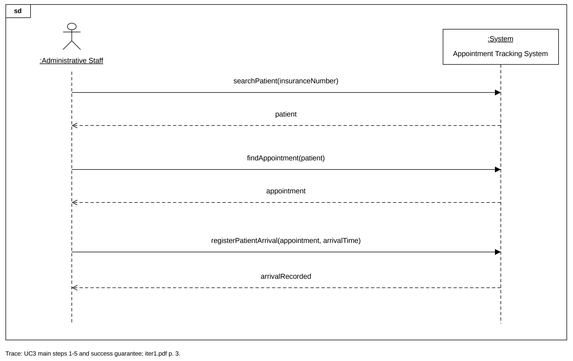

Trace: UC2 extension 4.a and main steps 1-4; iter1.pdf p. 3.

Outcome: No prescription created on this path; professional considers alternative care.

UC3 - Register Patient Arrival | Success

Precondition: Staff is logged in. The patient and today's appointment exist.

Trace: UC3 main steps 1-5 and success guarantee; iter1.pdf p. 3.

Outcome: Arrival time recorded in the selected appointment.

UC3 - Register Patient Arrival | Patient not found

Precondition: Staff is logged in. No patient matches the supplied insurance number.

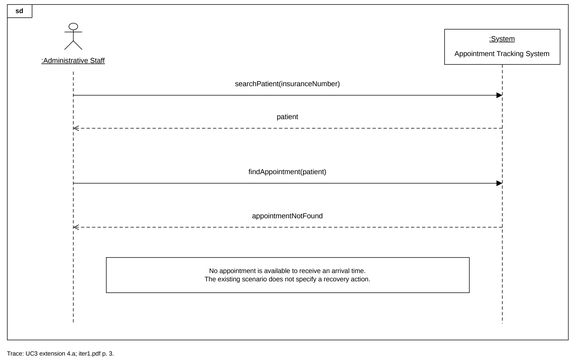

Trace: UC3 extension 2.a; iter1.pdf pp. 2-3.

Outcome: No arrival recorded; patient registration is required before resuming UC3.

UC3 - Register Patient Arrival | Appointment not found

Precondition: Staff is logged in; the patient exists but has no matching appointment today.

Trace: UC3 extension 4.a; iter1.pdf p. 3.

Outcome: No arrival recorded; use case cannot complete on this path.
